Reasons for Allowance

The following is an Examiner's statement of reasons for allowance:

The prior art of record fails to fairly, teach, show or suggest, by either anticipating or rendering obvious, the invention as set forth in the claims of the instant application.

Furthermore, a search made does not detect the combined claimed elements as set forth in the pending claims. Additionally, the reasons for allowance of the claims over the prior art of record is believed to be readily clear, self evident and apparent from the claim language set forth in each of claim 10, when compared and contrasted with the prior art.

More particularly, the instant invention (as set forth in independent claim 10) provides for a transfer device for information carriers of different sizes including a mobile frame for ensuring the transfer of an inserted information carrier, the mobile frame cooperating with a slider that ensures the setting of the inserted information carrier in an operative position, a detection mechanism cooperating with the inserted information carrier; a mobile linking element associated with the detection mechanism; and a plurality of projections provided on the slider, the projections being arranged at spaced-apart positions corresponding to the different sizes of information carriers, the mobile linking element cooperating with the projections to establish a connection between the mobile frame and the slider to ensure the transfer and the setting in operative position of the information carrier.

The cited prior art of record, however, does not teach, show or suggest, a transfer device for information carriers of different sizes including a mobile frame, a slider, a detection mechanism, a mobile linking element and a plurality of projections provided on the slider, wherein the projections are arranged at spaced-apart positions corresponding to the different

sizes of information carriers, whereby the mobile linking element cooperates with the projections to establish a connection between the mobile frame and the slider, in the manner as set forth in the manner, function and relationship relative to other claimed structure as prescribed by the independent claim 10.

Additionally, the cited prior art of record does not provide, alone or in combination with the art of record or general knowledge within the art, any suggestion or teaching for the invention as set forth in the independent claim 10.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
